# Fast Track Your ITSM Success with Fixed-Price Guarantee

Implementing a comprehensive IT Service Management (ITSM) solution like ServiceNow can be a daunting task. Many organizations struggle with long implementation times, high costs, and aligning the platform with their specific processes. These challenges often lead to delays, increased costs, and underutilized features, ultimately affecting IT service delivery and overall business performance.

Coreio's ServiceNow Fast Track is a pre-packaged, fixed-price implementation service designed to deploy the out-of-the-box (OOTB) ServiceNow ITSM modules quickly and efficiently. This service is ideal for organizations looking to leverage the power of ServiceNow without the lengthy and costly implementation processes associated with such robust platforms.

Get up and running in

Key Deliverables

- **Rapid Deployment:** Follow a structured 'On Track' approach with ServiceNow best practices and achieve a go-live within 8 weeks.
- **Proven Methodology:** Utilize a combination of ServiceNow Implementation Methodology (SIM) and Agile/Sprint-based development for a consistent, efficient, and adaptable delivery process.
- **Key Module Coverage with Immediate Benefits:** Implement essential ITSM modules including CoreSetup, Service Portal, Service Request, Knowledge Management, Incident Management, Change Management, HAM, and Reporting.
- **Expert Knowledge Transfer:** Ensure your team is ready to operate the system independently after the implementation with thorough handoff and support during User Acceptance Testing (UAT).
